Dual or multi monitor, simply share your desktop.

  - Which you show on screen in a classroom is important.
  - Maybe it is PowerPoint slideshow.
- **Sharing desktop is the easiest way**

## Audio test

When, a week ago today, I asked the House to fix this afternoon as the occasion for a statement, I feared it would be my hard lot to announce the greatest military disaster in our long history. I thought - and some good judges agreed with me - that perhaps 20,000 or 30,000 men might be re-embarked. But it certainly seemed that the whole of the French First Army and the whole of the British Expeditionary Force north of the Amiens-Abbeville gap would be broken up in the open field or else would have to capitulate for lack of food and ammunition. These were the hard and heavy tidings for which I called upon the House and the nation to prepare themselves a week ago. The whole root and core and brain of the British Army, on which and around which we were to build, and are to build, the great British Armies in the later years of the war, seemed about to perish upon the field or to be led into an ignominious and starving captivity.

We shall never surrender to covid-19.

When you terminate Breakout session

# Tips

- Face is not important. Camera is **not mandatory**.
- To get better audio condition, **headset is recommended**.
- Keep **students microphone muted** except when they have to speak.
  - In case of small number of participants, they can keep microphone open.
- Use “**Raise Hand**” functionality in case of large number of participants.
  - You have to be a good chairperson.
- I do **not** recommend **chat on Zoom**.
  - you **can not handle both** lecture and chat. (with TA, maybe it works)
  - **NUCT forum** is better. Even after your zoom session, students can interact each other.
